

REBEL

We are rebelling against the Government for its crimes against humanity

— *For 30 years scientists have been telling governments climate change will kill us*

— *During this time emissions have been allowed to increase by 60% and they're still going up*

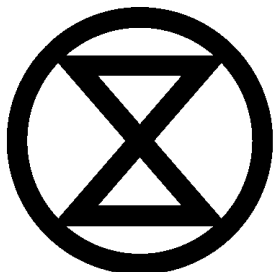

— *The forests are burning, the temperatures are soaring, the ecosystem is dying*

— *The lives of the younger generation are in the balance*

— *Find your courage and power through connecting with others, this is how things will change*

— *Because we are so very nearly out of time.*
